UC Export Folders

Mass export folders and documents

For Filesite & Deskside

Export workspace, folders and documents with one easy to use command

If you've ever needed to export the full contents of a Workspace, tab, folder, or even the whole of the My Matters content, then UC Export Folders is the utility to do the job. This utility integrates into the standard Filesite and Deskside menus to allow documents to be exported quickly and easily whilst retaining the folder structure.

## Easily export workspaces, folders and documents

With the UC Logic UC Export Folders it is now possible to export multiple workspaces, folders and documents with one easy to use command.

This utility integrates into the standard Filesite and Deskside menus and will export documents into a directory structure that matches the workspace structure.

As well as being able to export a whole workspace, you can also export a single folder or a collection of folders and sub folders. You can even export the entire contents of your My Matters folders.

Also generates a metadata text file of the document profile properties.

Key Features

- Exports folders and subfolders directly from workspaces, tabs and folders
- Filter documents and email messages
- Integrated into Filesite and Deskside clients
- Exports document metadata to a text file
- Exports files even if path length exceeds Windows limit of 254 characters

Requirements

- Autonomy iManage Filesite/Deskside 8.5/9.x
